## Objective

Laravel Developer with 1 year of experience in developing web applications, RESTful APIs, and database-driven solutions. Skilled in authentication, authorization, multiple database handling, and implementing business logic with clean, maintainable code. Seeking an opportunity to apply my expertise and grow within a dynamic development team.

## Experience

• <b>Brain Art IT Solutions</b> Laravel Intern	01-04-2024 - 31-10-2024
During this 7-month Laravel internship, I learned the fundamentals of PHP, Composer, and the Laravel framework, including MVC architecture, routing, controllers, Blade templates, and Eloquent ORM for database management. I also worked with migrations, validations, file uploads, and relationships while building small E-commerce projects.	
• <b>Veer Creation</b> Junior Laravel Developer	01-11-2024 - Present
Over the past year, I have gained strong experience in Laravel development, covering end-to-end project workflows. I have worked extensively with MVC architecture, Blade templates, Eloquent ORM, and database management, including migrations, relationships, and multiple database handling. My expertise includes building CRUD systems, implementing RESTful APIs with structured JSON responses, managing file uploads, and generating dynamic reports with PDF/Excel exports. I have also implemented authentication, authorization with roles and permissions (Spatie), notification systems, and complex business logic such as attendance tracking, salary calculations, and product transfers. Additionally, I am proficient with version control using Git, working with third-party packages, and deploying Laravel applications.	

## Education

• <b>Saraswati Vidhyalaya</b> Secondary Education 72	2018
• <b>Sadhna Vidhyabhavan</b> Higher Secondary Education 81	2020
• <b>Swami Atmanand Saraswati Science College</b> Bachelor in Computer Application 8.5 CGPA	2021-2024

## Skills

- Laravel Framework (MVC, Blade, Eloquent ORM)
- RESTful API Development
- Database Management (Migration, Seeder, Factories)
- Bootstrap, jQuery, Ajax

---

## Projects

- **Veer Creation CRM**
  - Developed product catalog management with categories, products and filtering.
  - Implemented user authentication & authorization for customers and admins.
  - Designed order management system for tracking, updating, and dispatching orders.
  - Added inventory and stock management with real-time updates.
  - Created admin dashboard for managing products, customers, and sales reports.
  - Built invoice generation & PDF download feature for customer orders.
  - Developed notification system with firebase cloud notification.
  - Optimized search & filtering system for faster product discovery.
  - Added multi-database handling concept for scalability and modular structure.
- **Clokify - Attendance Management System**
  - Developed CRUD systems (Departments, Notifications, Attendance, Salary Reports, etc.) with proper validations.
  - Implemented authentication & authorization using Spatie Roles & Permissions.
  - Built RESTful APIs with structured JSON responses for mobile and web integrations.
  - Designed attendance management system with image uploads, right-sidebar logs, and manual entry features.
  - Created salary report module with attendance-based calculations, extra/short hours logic, and Excel export.
  - Added file & image handling with custom storage paths (public/att\_image/{year}/{month}/{employee\_name}).
  - Integrated WhatsApp sharing feature for attendance details via public PDF link.
- **InstantReel - Instagram Reels Downloader**
  - Developed Instagram Reel Downloader with instant download capability by pasting reel links.
  - Implemented video + audio support to ensure reels are saved with original sound.
  - Added functionality to download high-resolution reel thumbnails/cover images.
  - Integrated with RapidAPI for fast and reliable reel data fetching.
  - Ensured clear original sound quality in all downloaded videos.
  - Designed a user-friendly interface optimized for desktop, tablet, and mobile browsers.
  - Enabled offline access by storing downloaded reels locally.
  - Implemented logic to preserve original resolution of both videos and images.
